Irish Turf Incense is a unique product, which allows you to have the distinctive smell of an Irish turf fire wherever you are in the world. It comprises of turf peat incense sods supplied with a square stone burner. The product works exactly in the same principal as any incense. By lighting the mini sod, the ignited mini sod lets off smoke, which fills the surrounding area with the unique smell of a peat/turf fire. It is absolutely necessary to burn the incense sod on the slate hearth provided, as the sod gets very hot with the burning process. We include a pack of loose mini turf samples for you to burn in your shop. Sales of the Irish Turf Incense increase dramatically when customers can get the smell of the turf incense, thus benefiting your sales of this unique product and enhancing the ambience of your store.
